Objective:

To evaluate the skill of designing a website using an online content management system (CMS).

Process:

You are required to design a website to share information about yourself or your business using wordpress.com, weebly.com, or wix.com.

Following features should be included in your website.

- Minimum five web pages
- Customer feedback form
- Images and Videos
- Google map to locate your business

Your end product should be a creative, comprehensive, and attractive website.

Output and Submission:

You are required to send the URL of the site to the given email.
